Quiz # 1 (A)

The greatest common divisor of integers x and y is the largest integer that evenly divides both x and y .

Write a recursive function `gcd` that returns the greatest common divisor of x and y , defined recursively as follows:

- If y is equal to 0 , then `gcd(x , y)` is x ; otherwise,
- `gcd(x , y)` is `gcd(y , $x \% y$)`

[*Note:* For this algorithm, x must be larger than y .]
